

Posture Pro is Windows 7 64 bit Compatible

With the release of Posture Pro 8, Posture Pro is supported by all versions of Windows, including 64 bit Home Premium. Previous versions of Posture Pro were 16 bit programs and required using the Windows VM to run in 64 bit versions of Windows.

However, with the release of Posture Pro 8 the software can be installed as usual on any Windows XP or Windows 7 machine.

Posture Pro 8 can be downloaded from www.posturepro.com/Downloads
