

re-do part of an exam

In the middle of a Posture Number exam I notice an error and I want to start over. How do I do that?

Once you start an exam you must complete the sequence for that exam. For example, if you miss the third point in the PN exam you must finish the next two points and let Posture Pro create the PN exam.

At that point you can click on Get Posture Number to restart the exam at the beginning.

If you make an error on the AP exam, finish the sequence for the body part, head for example, then click on the cartoon figure's head to re-do that part of the exam.

After an exam has been saved you can no longer re-do the exam
