

Change Exam Orientation, AP to PA

How can I change the exam orientation from AP to PA?

To change this orientation, hold down the Shift key and left click on either the IMPORT AP or Import Lat button. Whichever you click on will change to the opposite orientation.

The picture to the right shows the picture orientation if both import buttons are clicked.

The software should remember the last setting used.

NOTE: Regardless of the orientation used, the skeletal renderings will remain a PA and R-Lat view.
