

PP startup error

In cleaning up files, I deleted a necessary file. PP startup error says "This executable requires the asymetrix toolbook runtime system. Make sure its installed and in the PATH.

Reinstall Posture Pro. DO NOT UNINSTALL, just reinstall.

Since updates are free, we recommend you visit the Downloads area of www.posturepro.com to download and install the latest version of Posture Pro.

When installing, always accept the default installation location.
