

Posture Pro Insurance Billing Options

Codes that apply (usually, this Report must be given on a different day than the X-ray Report of Findings to justify a separate billing):

1) EM Counseling: 99211-25 (5 min) = Report of Findings = service doc-patient face to face counseling; (in Nevada, the relative value unit is $RVU = 0.59$) = [Discussion with patient about one of more of "Diagnostic Results, Impressions, Prognosis, Risks/Benefits of management, instructions for management, and or follow-up]. The modifier -25 means that this code is a separate service, i.e. a Report of findings. So if the DC went through the Postural Report and then showed them the exercises, it would be an approximate 15 minute service.

2) Depending on the time used to explain their posture and Mirror Image exercises, there are increasing RVU amounts possible:

(a) 99212-25 (10 min) = "; ($RVU = 1.03$)

(b) 99213-25 (15 min) = ", ($RVU = 1.42$)

(c) 99214-25 (20 min)

(d) 99215-25 (25 min).

3) Code 97750 Physical performance test or measurement complete with written Report (relative value unit = 0.77). For examples in Nevada, from low-medium-better, one unit is \$56USA; for 99213, we have $\$56 \times 1.42 =$
 $\$79.52$and for 97750, we get $\$56 \times 0.77 = \43.12 .

Additionally, it appears to us that:

1) A DC could bill for both codes:

a. $99212 + 97750 = \$57.68 + \$43.12 = \$100.80$ OR

b. $99213 + 97750 = \$79.52 + \$43.12 = \$122.64$.

2) A DC could bill for both codes because 97750 is posture evaluation with written report and one of the 9921-* is a face to face report of finding.
