

Unlock Code Won't Work on New Computer

I have installed Posture Pro on a new computer. The old security unlock code does not work.

We use a unique type of security system that is tied to certain unique features of each computer. A code on one computer will not work will not work on another computer, by design.

Here are the steps for changing computers.

To move programs from the unlocked computer to another computer you must first use the red uninstall button at the software registration screen. Send us the uninstall text that appears on the screen

There is a \$25 charge for this service.

There is a \$100 charge to unlock a new computer if the uninstall information cannot be provided.

You may purchase these credits at www.bestpostureproducts.com and select Technical Support Options.
