

In the effects of time feature, normally how long would I say the effects of time is to the patient? eg: the distortion is a calculation of ten years down the road.

In the effects of time feature, normally how long would I say the effects of time is to the patient? eg: the distortion is a calculation of ten years down the road.

Because everyone react differently to the stressors, 7-10 years is a general rule.

The Effects of Time shows the location and strength of additional mechanical forces that are attacking the body. The greater the mechanical force the faster the stress will break down the body. The Effects of Time feature is one of the most important features in Posture Pro.
