

Can I install Posture Pro on a Tablet PC?

Technically if the tablet is running Windows as the OS you can install and run Posture Pro. However because of the smaller size screen, generally 25-30% smaller, you might find it difficult to do the exams.

For the Posture Pro Touch we wrote a special version of Posture Pro 8 specifically for the tablet we selected. It makes the exam easier and more accurate on the smaller screen. Presently, this special version of the software is only available pre-installed on the Touch.
